

## Quick Access to the Most Needed A/P Information

- Search for vouchers and other A/P documents by any key field
- See the checks and memos used to pay an invoice
- Display a list of vouchers / invoices paid by a check
- Generate letters and spreadsheets at the click of a button

## Accounts Payable IntelliView

Accounts Payable IntelliView provides the powerful accounts payable inquiry capabilities most needed by Solomon users.

IntelliView lets you answer commonly asked questions:

- "Has vendor invoice number ABC123 been paid?"
- "What check number was used to pay the invoice?"
- "What account was it written on?"
- "Were any memos applied against the invoice?"
- "What other items were paid by the check?"
- "Has the check been cleared?"
- "What invoices have been paid for project EN123?"

IntelliView lets you retrieve documents using any key field or user field. Specify the exact value or use wild cards to search by:

Account Nbr	Purchase Order Nbr
Batch Nbr	Subaccount
Check Nbr	Vendor Id
Company Id	Vendor Invoice Nbr
Currency Id	Voucher Nbr
Project Id	User Fields

IntelliView automatically sets the relevant options or you may set them yourself.

Limit your search by document type and document status. Further narrow your search with any of six date selections and three period definitions:

Date Cleared	Pay Date
Discount Date	Period Closed
Document Date	Period Entered
Due Date	Period to Post
Invoice Date	User Fields

Sort the results by invoice number, reference number or any of the key fields and dates.

The screenshot shows the Accounts Payable IntelliView application window. The search criteria are set to 'Vendor Invoice Nbr' with a value of 'ATM3%'. The results table displays the following data:

### Answer Questions Quickly

In the screen above, the user is searching for vendor invoice numbers beginning with "ATM3". Search using all or part of any of the key fields. See vouchers followed immediately by the checks and debit adjustments used to pay them.

IntelliView displays related documents. For instance, a voucher is immediately followed by the related checks and debit adjustments used to pay the voucher. A check is immediately followed by the vouchers and adjustments paid with that check. The related documents always begin with "---->", making them easy to spot.

IntelliView even makes it easy to "drill across" to all the documents for the same vendor, project, purchase order, subaccount, check, or voucher as contained in any row of the result grid.

Export results to Microsoft Excel®, generate customized letters and documents with Microsoft Word® documents, run Crystal reports, or drill down to Solomon screens with the click of a button.
